

October 26, 2018

Dear Northwestern 3rd Grade Families,

I hope everyone enjoyed a day off this Friday. The teachers were busy looking at student work and making plans for the next couple of months. Below you will find some details and if you have any questions please reach out.

New Math Unit

We have finished our first math unit drawings of multiplication and division. We have not mastered the concept, but we will continue to work on it all year long. Our next topic will be about problem solving with units of measure like feet, inches, pounds, and more.

We will continue to send some homework in math. Remember that even if they don't finish all the problems, kids should spend 10 minutes and then be finished.

Halloween Party!

We will have a small Halloween party in our class on Wednesday the 31. Students who want to bring a costume without a mask or a small treat may do so. If students don't bring anything, everything will be JUST FINE! Do not worry about this at all.

Important dates:

October 31- Small Halloween party in class

November 7- Fall fest 4:00-6:00

Sincerely,

Mr. Mitchell
